Hubs operating model

Each hub includes new and returning local teams that meet up for troubleshooting, practice matches and regional tournaments. While supporting their local community, teams build confidence and overcome obstacles as they prepare to compete in alliances and earn awards. FIRST alumni, sixth-formers, university students, STEM advocates, and parents are the fabric of our FIRST community. **Grassroots** Champion **Teams** These movers and shakers Community **Orgs** strengthen the impact of FIRST UK in their regions from guiding teams to cheering on the bots at tournaments. **FIRST** On the ground TECH stewardship from local **CHALLENGE** delivery partners enables the programme's regional UK HUB expansion. Champion organisations and delivery partners provide excellent facilities and people to host **Delivery Industry Mentors** local tournaments and **Partners Partners** support teams in person. We collaborate with industry partners to drive social mobility, strengthen the STEM talent pipeline and fuel the programme with **Volunteers** financial and in-kind support. Partners based in FIRST UK hubs offer invaluable support on-the-ground through mentoring and event volunteering. A-Team Building More Than Robots™
